

Designed with flexibility in mind, NimbleMic provides much more than ordinary consumer microphones.

### Simple. Portable. Nimble.

The JAVS NimbleMic is a high-quality consumer-grade boundary microphone with a host of programmable features. Designed for the JAVS Nimble USB interface, NimbleMic includes a customizable tri-colored light indicator, and a configurable, feather-touch push button.

Each microphone can be configured independently, allowing the operator to choose the microphone setup that best suits their needs.

- Compatible with standard PC mic input
- Capacitive touch, programmable push button for Push Once to Talk, Hold to Talk, Push Once to Mute, or Hold to Mute
- MEMS Omnidirectional microphone
- RFI and ESD protection
- RoHS compliant
